academic ethics is the study of moral problems arising in higher education these may concern the responsibilities of professors or the institutional policies of colleges and universities in this work steven m cahn a pioneer in the field brings together his essays concerning four provocative issues curricular controversies tenure processes affirmative action and pedagogic obligations written with his characteristic clarity and imaginative examples cahn vividly demonstrates how academic life is replete with practices that raise moral concerns

those who begin the study of philosophy may easily become discouraged many classic texts are daunting in their complexity and much contemporary writing is intended primarily for a professional audience a few prominent philosophers of our day write in a style understandable by all but nonspecialists are often left unaware of this work they may never realize that serious discussion of central problems of philosophy can proceed without arcane terminology unexplained references or convoluted arguments the guiding principle of this book is that reading clear concise essays by recent philosophers offers an inviting avenue to understanding philosophical inquiry while some of the articles are reprinted in their entirety

many are shortened to sharpen their focus and enhance their accessibility for readers who wish to understand the development of philosophy over the centuries i have included a substantial number of historical sources including without abridgement plato s defense of socrates crito and meno as well as substantial segments from his republic descartes meditations on first philosophy and hume s an enquiry concerning human understanding and dialogues concerning natural religion most of these are identified by the name of the work from which the selection is drawn while with regard to some of the recent essays i have taken the liberty of developing short descriptive titles

in this remarkably accessible concise and engaging introduction to the philosophy of religion steven m cahn brings together a rich and balanced collection of sixty six classic and contemporary readings this unique anthology features a clear well organized structure and careful editing of many articles in order to sharpen their focus and make them understandable to students with little or no background in philosophy the book also reflects the importance of women s contributions to the field 40 of the contemporary readings are by women in addition topics often minimized in other collections are covered in more depth here including forgiveness and love ritual prayer and worship gender speaking of god and the afterlife

the topic of human free will has received more attention in the past several years due to the important discoveries of neuroscience but no consensus of opinion is evident in related disciplines the traditional approach to understanding free will in philosophy employs conceptual analysis to determine whether humans have freedom of choice theology affirms that every person has free choice although god is somehow behind all human decisions evolutionary psychology points to human behavior as the product of biological processes and antecedent events and neuroethics attempts to define what it means to be a thinking moral agent by investigating how neurons in the brain and chemical interactions combine to produce conscious actions an assessment and evaluation of these various positions is given in light of the evidence the issue of whether a person can be held morally responsible for their actions hinges on whether those actions originate from free will or are the result of determinism theology makes assumptions of the existence of an absolute deity that has a hand in human decision making but there is no agreement regarding the nature of that intervention recent scientific discoveries confront traditionally held religious beliefs and necessitate the creation of a new theology and articles of faith

this book offers an original intersection of concepts from immanuel kant s moral command ethics and søren kierkegaard s existential ethics the kantian formulation of moral law is based on theoretical ground while kierkegaardian ethics of the quest for selfhood views it as the very act of living the present work provides an account of both these perspectives and questions whether these approaches to morality are mutually exclusionary using slavoj žižek s parallax view in the realm of morality it argues that moral philosophy must engage with a constant critique of difference around which the transformation of our various perspectives to morality revolves this work appeals for furtherance of the conversation model and participation of perspectives to transcend positional confinement it advocates the traversing of the ethical parallax to allow for intellectual openness and an empathetic perception of the other engaging and well researched this book will be of interest to scholars and researchers of ethics political philosophy and continental philosophy

philosophy and theology are important concepts for christians this important work identifies

how philosophy shapes theology while also addressing various philosophical issues that arise within the bible and theology the hope is that this book will catapult the reader into critical thinking while creating an appetite and appreciation for these separate yet similar disciplines

is prostitution immoral in this book rob loving argues that it is not offering a careful and thorough critique of the many twenty to be exact arguments for prostitution s immorality loving leaves no claim unchallenged drawing on the relevant literature along with his own creative thinking loving offers a clear and reasoned moral defense of the world s oldest profession loving demonstrates convincingly on both consequentialist and nonconsequentialist grounds that there is nothing immoral about prostitution between consenting adults the legal implications of this view are also brought to bear on the current discourse surrounding this controversial topic
